# RABBIT IN REFRIGERATOR

## COOL SPOT FOR IT TOO

Woman: (opening the door of her refrigerator and finding a rabbit sitting inside): "What are you doing in here?"

Rabbit: "This is a Westinghouse, isn't it?"

Woman: "Yes."

Rabbit: "Well, I'm just westing."

## Will Labour Win Victory | In Campus By-Election

## Candidates Statements

### PRESIDENT

Bit by bit, EVERYONE on the campus is beginning to recognize that Skule is tops. Skule Nite, School-at-Home, Skule Athletics all are heralds of the rapidly rising standard of Skule Activities. At the same time Skulemen are prominent in all University functions—Feather Fair, Blue and White Society, S.A.C., Hart House activities, All Varsity Reverses, etc.

If I am elected (That's a cliché brother) I will keep up this present high standard and if possible raise it; even in the face of ever decreasing enrollment and funds.

This subject of funds is a ticklish matter. Nevertheless it is one that cannot be ignored. The large enrollment of the past years has been able to absorb the higher expenditures of the Society, without burning a hole in YOUR pocket-book. To maintain such a desirable situation a policy of close watch on the budget must be kept.

Let's keep Skule tops for the same price.

John Folinsbee.

I have been asked to present a tentative platform which would be followed in the event that I am elected as President.

The pitfalls facing next year's executive will be many. One of the more important being the necessity for reinforcement. We would all like to see Skule affairs continue on their grand scale, but with the enrollment falling off so also does the revenue. It will be necessary to do more with fewer dollars and people. Therefore it is necessary that every engineer be willing to contribute some of his time and energies to Skule affairs. Our society will not run itself, it must have leadership and drive injected into it.

Another point which I would strive to build up is the prestige enjoyed by the Engineering Faculty from the rest of the campus. It is a case of directing the energies of a group of high spirited men to the best advantage for Skule and the University. We do not want our faculty to stop being the dynamic force of the campus.

J. R. Gregory.

### APPLICATION FOR EMPLOYMENT

Position sought: President of the Engineering Society.

Name: Brian Judges.

Course: Mechanical.

Qualifications:

(1) First Vice-President, Engineering Society, Ajax, responsible for the many fine Ajax functions including the last Engineers' Ball held in the Recreation Hall;

(2) Member of Hart House Committees—both at Ajax and Toronto;

(3) Assistant Producer of Skule Nite 570;

(4) Entertainment Chairman for the C.O.T.C. Ball;

(5) Assistant Organizer of Blue and White Society Dances.

Aims:

(1) To promote more harmonious Staff-Student relationships by introducing a proposed system such as the one which successfully functions in the School of Architecture;

(2) To provide a broader scope for the staff of the Engineering "Bible"—

Toike Oike—by attempted financial budget increase;

(3) To provide more publicity for Skule functions by means of the aforementioned Toike Oike;

(4) To attempt a complete revision of the Engineering Society Constitution, which has been in effect without revision for the past 20 years—including investigation of the Hare Spence electoral system which resulted in the spoiling of approximately 10% of the Ajax ballots polled last year;

(5) To canvass Club Chairmen and Class Reps for capable men to serve on society committees, thus including men who are eliminated from serving by not knowing the actual members of the Executive.

May I have your consideration in the coming election openings?

Yours sincerely,  
Brian Judges.

### FIRST VICE-PRESIDENT

The First Vice-President is in charge of all social functions of the Engineering Society. As a club chairman at Ajax I gained valuable experience in the organization of such functions as the Engineers' Ball of 1948. This experience will enable me to produce an even better Skule-at-Home than this year's. Being the best show on the campus, Skule Nite cannot be improved upon. I will attempt to maintain this standard.

But next year I will give more Skulemen opportunities to participate in the organization of such "do's".

Remember: "DES DOES EVERYTHING!"

Des Boggs.

The position of Vice-President of the Engineering Society calls for considerable organizational experience. In various executive positions on Skule and other University organizations, I believe I have acquired the experience required. The office has been held in the past two years by extremely capable men, and if I am elected I will do my best to maintain their standards and improve on them where possible. The amount of publicity given Society meetings and budgets can be much improved, but I prefer to work after the election rather than talk before it.

Al Heiry.

The position of First Vice-President of the Engineering Society needs a reliable man who is willing to execute the duties and responsibilities of this position with new imagination for the coming year.

Bruce Mairs is the man to take on this job for 571 "Scotty" Mairs has taken active parts in the last two years in Skule Nites; has served on the University of Toronto Debating Union committee and has done much in promotion of Mock Parliaments on the campus.

Vote Bruce Mairs to make 571 the most successful year Skule has seen.

Bruce Mairs.

### SECOND VICE-PRESIDENT

Article 8, Section IV, Constitution and By-Laws of the Engineering Society

The Second Vice-President shall manage the Supply Department, carrying on hand a supply of draughting materials, stationery, and such other

(Continued on Page 3)

Here it is again, Election time in the land of the forsaken,—everybody votes, and everybody benefits. That is, everybody who wants to take the trouble on February, Friday 24th, to mark a ballot in any of the three places, the Little Red Skule House, the Mining Building or the Mechanical Building.

You can meet the candidates in Convocation Hall on Thursday at 4 o'clock when they'll all be on hand to give their platforms, mythical or otherwise, well studded with jokes (we hope) and try to prove their supremacy over their opponents, and why you should vote for their respective selves. Don't forget to come and hear your friends, heckle them, see how they react under pressure. After all, they'll be under pressure for the rest of their stay in office. Who knows, maybe if you have a quick wit for subtle jokes, you can pick up a few for those future mixed parties.

In previous years, the voting has been only fair. True, we have as many as 66% of the total eligible votes cast, but that still is 34% short of our objective. The people who are elected represent you, and protect your interests. Turn out and vote for the person you consider best. Don't take the attitude "what will one vote mean," it may very well mean that your choice will be the man who will guide the Engineering Society along its high course as the best organization on the campus. Your vote may well mean the difference between mediocrity and superiority, in the next Engineering Society Executive.

We want a 100% vote, so GET OUT AND VOTE!

## Shelf Your Cares At Drill Hall Jamboree

Whether you win or lose, or don't even run, you'll be as welcome at the Post Election Dance as tea and crumpets at an Artisan's Stag. This magnificent social event will happen to the Drill Hall on Election day (and if you don't know when that is you don't deserve to come) from four to six thirty p.m. The election results will be announced during the dance so you might as well come along. Dancing gives the same effect as pacing the floor and it's a lot more fun. The women will be stout-hearted volunteers from P.H.E., Vic, Whitney Hall, O.T., St. Hildas and P.T. The Physio girls will be running a coke bar and selling cookies (no, we don't know whether they made them themselves, we're just mentioning it) in order to raise a little cash for their scholarship fund. They're providing some special entertainment too, to go with the cokes,—nothing less than a can-can line. And for those of you who are reaching into your pockets at this point and finding nothing but your fingers, we hasten to add that there will be no admission charged. For the fantastically small sum of nothing whatsoever you can get to put your arm around a codd. Furthermore, you will find the gay hoof to the incomparable music of Les Drake and his orchestra. So come on out and enjoy yourselves men; and don't forget to vote before you come. That way you can celebrate with a clear conscience and gay abandon.

## An Open Letter to YOU Love and Glory

That's what the song says:

"It's just the same old story,  
A fight for love and glory,  
A case of do or die."

But that's only the song.

Look at life in these times: are we fighting for love and glory, or even for our so precious, and oft-touted governmental ideals? There were seven cases of no candidates at all, and about four more of election by acclamation which is almost as bad, among the nominations for Eng. Soc. officials. To mathematically-minded, slide-rule conscious Engineers, this represents almost 25% of the total available positions which were not contested at all!

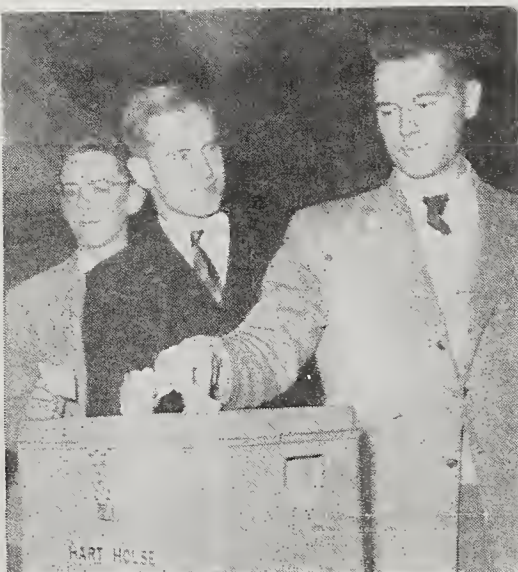

So much more guff, you say? Stop to think about the myriads of speeches that have been made by our oil-slick orators. They aren't all phoney. Think about it for a minute or two.

If you make a practice of neglecting details like these which are so intrinsic to your everyday life at S.P.S., why won't you do the same thing later, long after they finally boot you out of this sanctuary?

To take two widely separated illustrations: the Varsity Staff resigned recently in protest of the violation of its rights; a few years ago millions of people were dying to preserve their hard-won rights.

On Monday of this week, 2,973 Engineers did not even feel like asserting their rights by filling to overflow the list of candidates for their representative governing body. Don't try to claim there aren't enough capable men around. Remember there are 2,972 others besides you.

And some people wail about the lack of student government.

The annual elections of members to Hart House Committees will take place on March 8th from 12:00-2:15 and 4:00-6:15 in the East Common Room and the Reading Room in Hart House.

Committees to be voted for are: House, Library, Debates, Squash Racquets, Music and Art Election to the Glee, Chess, Camera and Radio Clubs is limited to membership of the clubs.

Up until last Monday night very few nominations had been received—even from Skule. Last year the engineers swept the polls with a near solid vote of 89% of the Faculty. We can do it again with the same all-out enthusiasm.

THURSDAY, 23rd FEBRUARY

It's Your Executive

Engineering Society elections will be contested on Friday. The results of the elections are important to you. If you are in your graduating year, the graduate executive is your link with Skule.

If you are in a lower year, the Society will be in large measure, in control of your year.

To fail to vote because of apathy is to your shame.

To fail to vote because you "don't know the candidates", is no excuse. It is more than your privilege, it is your duty to vote. It is your duty to familiarize yourself with the candidates.

Candidates do not appear on the scene on the day of nominations. They have been around for at least a year. They have classmates. They have friends. They also have enemies. In almost every case, there are people around who know the candidates and can "give you the low-down."

The elections are important. The Society runs the stores, organizes social affairs, arranges field trips, brings speakers to the faculty, publishes Transactions and Year Book and *Toike Oike*, and almost countless other things. The members of the Engineering Society executive are your representatives to other faculties, and universities.

It is *your* money that the Society will spend next year. Pick men who will spend it well.

Engineering Society elections will be contested on Friday. The results of the elections are important to you.

Varsity versus S.A.C.

We could not agree more heartily with the stand of *The Varsity* staff in the recent controversy with the S.A.C. We consider the motion on advertising "dropping" to constitute an infringement of the rights of the editor and a vote of lack-of-confidence in the editor.

Admittedly, *The Varsity* operates on a tight budget. Admittedly, dropping advertising cuts the revenue. The editor knows this. He knows it as well as the business manager does. He is far more conscious of it than is the average member of the S.A.C.

Advertisements have been dropped from *The Varsity*, without prior consultation with the business manager, twice in the past two years. In each case, the editor considered it necessary. It was not a frivolous action. In the second case, the "cause celebre" of the S.A.C. motion, the loss in revenue was one dollar and ten cents.

The taking from the editor of the right to drop advertisements *when necessary*, is a lack-of-confidence vote. To pass, immediately after, a vote of confidence is to attempt to glaze over the action.

The editor resigned. The editor had no choice. The S.A.C. might just as well have fired him.

The S.A.C. would go a long way toward proving itself a mature body by admitting the error and wiping the motion from the books.

John Couse

One of the stalwarts of the Engineering Society has been temporarily lost to the Faculty.

John Couse is in Sunnybrook Hospital with tuberculosis. He will not be able to return to Skule until next fall. The place will miss him.

In his work on the Society and in Skule Nite, John has built up a reputation that will last.

Among his class-mates John has built up a reputation for friendship that would be difficult to surpass.

Best of luck, John. See you soon.

Spring Song

The flowers that bloom in the spring, tra-la,  
Have nothing to do with my case;  
For when twelve pints are under my belt, tra-la,  
I smell like a barrow of smelt, tra-la,  
Yes, I don't really smell very nase,  
Yase, indeed I don't smell very nase;  
For although when I'm drunk I cavort and I sing  
And at dances a very gay hoof I do fling  
Yet I reek like an old Arab's armpit in Spring,  
Like an old Arab's armpit in Spring.

The flowers that bloom in the Spring, tra-la,  
Don't smell like a keg of moonshine;  
Oh, the sweetness of grog has a thorn, tra-la,  
And us drinkers have plenty to lorn, tra-la,  
For we smell like a shipload of cod,  
Like a shipload of well-seasoned cod.  
And that's what I mean when I say and I sing:  
A drinker may reek of most any old thing  
But not of the flowers that bloom in the Spring,  
Not the flowers that bloom in the Spring.

SPORTS

Squash Tourny Now On Playoff Patter

**A Plea for Perspicacity**

Last week I asked you, as logical-minded personages, to expend a little energy by inquiring around about the various types who are running for Athletic Executive positions. Hope you take the bit of well-meant advice, because you, and the clod sitting next to you as you read this, are the guys who are definitely influencing the Skule athletic future, which can have a capital F if you choose right.

Now that the nominations are all in, we can survey the slate with a little more wise nodding of heads, and sneering at some misguided fool who thinks he has a chance against our boy Joe.

Among the present executive-up for re-election are: Rod MacLennan for president (in by acclamation, and a very fine choice), Bob Beattie for Sec.-Treas., Bob Sparrow for ST2 Athletic Rep., Wild Willie Moore for ST3 Athletic Rep. These boys have a terrific fight in store for them, as they are opposed by as fine a slate as has been seen for years.

The opposition, in order, is Joe Cuccia, Denis Dos Santos and Will Clark, and George Smalley. Shake hands, chaps, go to your corners and may the best man win!

On the sordid side of things, friend John Folinsbee has suddenly and for no accountable reason turned honest. Of all things, he is running for THE job: Mr. President of the Engineering Society. John has proved convincingly his level-headed organizational ability on the Athletic Exec. this past year, but he will have some tough competition from Messrs. Brian Judges and John R. Gregory. From the uncouth side of the tracks we wish you luck, old comrade.

**Why get plastered?**

Another large and oh so very important candidate for the yearly election schemozzle is the guy who is chosen for the special Bronze "S". This is absolutely the greatest honour which can be bestowed on a Skule athlete, and that's in all seriousness. It is voted to the Fourth year SPS athlete who has contributed most to his faculty in his time at the U.

There will be three or four names on the slate of candidates, some of them well-known, others used by now to unpublicized oblivion. It's the same old story: don't pick your candidate blindly.

So look about and don't just hand the Bronze S off to some chap who has been ballyhooed on a Big Blue glory team, it's much too valuable.

**About Face.**

Elections, predilections, fooley! They ought to do it the way we do in Russia. Comes the revoloshoun and we'll all have Reed Trophies, etc.

A subject dear to the heart of most Skulemen: Wenches, and playing hockey too! These delectable dishes of whom we sing have fashioned the enviable record of Won four, and Lost one. Such are the accomplishments of the curvaceous Physio therapists, the same that are at this very moment providing solace and comfort to the weary workers repairing the Varsity Stadium.

Under the excellent tutelage of Pops Cec Turcotte, of Big Blue fame and the tender ministrations of Trainer Paul LaPrairie, of sour-nosed LGMB fame, the lasses have learned the art of defense tactics and attack repulse rapidly.

With this board of strategy masterminding, the gals have scored 14 goals in the four games, and the goalie has fashioned for herself 3 shutouts. It should only happen to a Skule team!

The affinity between SPS and the gels has extended far beyond the two lucky guys mentioned above, for at each game there are about 230 Skulemen in the bleachers, madly cheering for good old FIZIO, rah, rah.

It may be a mere co-incidence that Trainer Lap is attracted by the team's leading scorer, Phyll Wilks, and that several other budding Engineers are hotly pursuing the other leading markswoman, Miss Lil (Six Goal) Batanoff, and rough-tough guard Shirl Norwich, but it is certainly no accident that 11 of the graduating class of 22 are attached (and not by any iron ring either) to Skuletypes.

In view of such activities, why don't we simply take a leaf out of City Council's book and annex the whole effort, to make the chase easier?

Such amicable and honorable relations between these two excellent campus groups should definitely be publicized, and so it has been.

In conclusion: VIVA LA SKULE DE FIZIO!

The Golden Key

There has been a slight mix-up concerning the eligibility of various persons bobs and sobs for the coveted Managers' keys. In order to clear up the confusion, John Folinsbee, Mr. First Vice Prez. i/c of awards has made the following statement. Quoth he:

'Any FOURTH year man who has, in any one of his four (or more, heh, heh) terms of confinement within these Scarlet walls, managed a MAJOR league team, or any FOURTH year man who has been in charge of a minor league sport (i.e. the fellows in charge of all swimming, or volleyball teams) is eligible for the Manager's key'.

Unquoth he.

There will be a list on the bulletin board in a day or so. If you think you are eligible, sign on, and your application will be checked with the records. Remember, you must be in FOURTH year. The rest of you can wait your chance. This will no doubt provide you with some incentive to progress on to fourth.

Athletic Awards At 'S' Dance

**What?**

Something new has been added to the roster of grand SPS social events! Instead of a dull, speech-filled, stag only banquet, the Athletic Exec. has decided to transform the presentation of Athletic Awards into a large bisexual event. Now your best wench can have the pleasure of seeing you march up and receive your treasured "S", your manager's key, or other award which you so valiantly won with the sweat from your armpit.

**Where?**

Yes, the big Athletic do of the year will really be something. It is free for nothing, at least for all eligibles for the "S" or manager's key, and interfaculty champs. The place chosen is perfect for gathering like this—Club Kingsway; March 15 is a date which will allow everyone to be out.

**You too!**

A limited number of tickets will be available to team players who aren't eligible to attend, but want to join in the fun. These will be on sale soon, for \$1.50 per couple. This is a dance that you will remember for a lifetime, so don't line up anything else for March 15.

The Intramural Squash tournament swept to a flying start Tuesday, February 21st, in Hart House. No, it isn't too late to see this fine and honourable but oft unobserved sport, it's due to continue at its high peak for the next week, several games being played each evening.

The matches are to be run every evening to completion from 5 o'clock to 7 o'clock, and should be well attended. Where else can you see a hard fought, grinding sport, free gratis and high altitude ringside seats yet! Where else can you look down upon someone and not be called a snob?

The matches are to be run off by the draw system, whereby winners of each match proceed to meet the successful competitors of previous games. The entire field is crammed full of top-flight artists, the outstanding entry being from Trinity, who has placed third in the International Squash Tourny.

Participants from Skule are eight: C. Deloese, R. Bowden, J. Hall, D. Geary, D. Grey, R. Wisener, H. Lawson, and T. Pezzack. Come out to see the boys perform and see then uphold the honour of Skule. They aren't beaten until that final stroke of the racquet and will do just so much better if you show them you're out and behind them.

In the spring a young Skuleman's fancy turns lightly to thoughts of . . . not exams (ugh, patoie) . . . definitely not love . . . but to the all-important playoff picture. Things is comin' to a grandiose climax, and before long the last championship will be tucked away in some musty old trophy cabinet, causing Mac and Miss Boyd great relief.

Cage Cuties

The basketball picture is slightly rosy, for how long no one knows: both Senior and Jr. SPS quintets have wangled their way into the tiffs for the Sifton Silverware. Much will be decided before the end of the week, but no predictions please; that is, unless you want to subscribe to the regular Klairvoiant Kalkulators, Ink To do so, merely tear the top off the nearest Artsman and deposit, with one worn out sliderule or reasonable facsimile, in the ashean in the Northwest corner of the Men's washroom in the Skule basement.

Minor league basketball is much better than the major counterpart; in fact this excellent condition of affairs may excite as shocking pink in appearance. 4th Civils, 4th Eng. Bus, 3rd Mech. and Chemicals, 2nd Eng. Phys., and 1st Eng. Bus. all seem assured of playoff spots, with 4th Civils definitely pointing for their second straight league championship.

Hockey Hoozovers.

This is a rather ticklish subject: viz. only two out of the seven teams entered are now in the playoffs, and by the time this gets into print, this number is liable to be depleted to boo-all. The Juniors are at the time of writing engaged in the throes of immortal combat with the powerful St. Mike's entry, and the Seniors are on the ropes, after a 3-1 loss to Trinity A. However, the Buttery Boys seem to have used an ineligible player, and there just may be a wee replay. It's a heck of a way to keep in the game, but the same thing happened to the SPS swim entry last fall, so don't tect too guilty about it.

Trials and Tribs.

With only these hockey, basketball and squash competitions to be finished off, it doesn't give the old Blue and Gold athletic supporters much chance to catch up on that Trinity lead in the Reed Trophy gallop. And yet anything can happen between now and March the somethingth when the final results will be tabulated. Look for a good showing by Ditz Barr's boys in the indoor track; they've been going great guns, and are liable to end up on top with quite a few valuable points.

As Hamlet said, 'to dream, aye there's the rub,' so leave us just sit back and chew our collective fingernails until the final word is said.

SECOND VICE-PRESIDENT

(Continued from Page 1)

merchandise as shall be considered necessary, and shall report to the Executive Committee as to its conduct. Skulemen

My nomination for the position of 2nd Vice-President has been accepted and now it remains up to myself to convince you that I am the best man for the job. Having served on the Engineering Society 1949-50 in the capacity of secretary, I was in a position to gain much experience regarding the operation of the Society Stores. I feel that if I am elected the stores will be operated in an efficient business-like way, turning back the profits to Skulemen by reduced prices wherever and whenever possible.

I ask you to vote for George R. Burns for 2nd-Vice-President of the Engineering Society.

George R. Burns.

**THE LAST WORD.** The Juniors lost a hard-fought battle with St. Mike's A hockey sextet 4-2, eliminating themselves from further activity for the year. The Seniors replay with Trinity, who lost themselves 100 large Reed points for the infraction.

Overheard at the Toronto Nurses Interscholar Dance: 15 Trinity men singing "Godiva". Imitation is the sincerest form of flattery.

A Sporting Endeavour!

The feature attraction at the All Varsity Spring Dance to be held in Hart House, March 3rd, will be a recital by the Lady Godiva Memorial Band. This will be supplemented by the first All Varsity Quartet Contest. Entrants to the contest are: Skule (The Four Flushers), Meds, Forestry, Wylliffe, St. Mikes, Knox, Music and Law. There will also be dancing to Art Hallman, Bob Cringan, and another band or two. For those who tire of dancing, the east common room will be filled with chesterfields and soft lights, while a pianist will provide soft music. It has been suggested that you bring a friend of the opposite sex, and partake of some of this shm-o-o-o-th music.

The Blue and White Society is practically dead. A Trinity-St. Mikes motion was passed curtailing the number of pep-rallies, for cultural reasons. Anyone who read the Varsity would know that there weren't enough cultural events to educate an artsman. The pep-rallies weren't worth going to. Who wants to watch a group of Engineers spend several hours insulting Skule. The Roam-around Dances are over-crowded and a great muddle. We need more cheap dances so that you can take your gal out and still be able to buy a cup of coffee on Monday.

The S.A.C. has killed the Varsity. Bob Hetherington forced the resignation of the Varsity masthead because of their "Adolescent attitude". The adolescents included 4 men in their late 30's who have had years of experience in newspaper work and who knew what the issue was. I attended that meeting and was surprised at the ignorance of the councillors. I am convinced that most of the councillors did not know what they were voting for. We need the former editors if we want a Varsity of even the present type. If they are returned we will be able to start improving the Varsity along the lines of the Bracken Cup judges report.

What is wrong with the SAC starting a limited liability accident fund for the Science and Engineering students injured in the Labs? There have been several accidents lately and there is no compensation.

"Keep Skule on Top at the Same Price"

**Damsels Beware**

Verily, I say unto ye, marry not an engineer:  
For an engineer is a strange being and possessed of many evils.  
Yea, he speaketh always in parable which he calleth formulæ.  
He wieldeth a big stick which he calleth a slide rule,  
And he hath only one bible, a hand book.  
He thinketh only of strains and stress, and without end of thermodynamics.  
He picketh his seat in a car by the springs thereof and not by the damsels.  
Neither does he know a waterfall except by its horsepower, nor a sunset except that he must turn on the light, nor a damsel except by her weight.  
Always he carrieth his books with him, and he entertaineth his sweetheart with steam tables.  
Verily, though his damsel expecteth chocolates when he calleth, she openeth the package to discover samples of iron ores.  
Yea, he holdeth her hand but to measure the friction thereof, and kisseth her only to test the viscosity of her lips.  
Even as a boy he pulleth girl's hair but to test its elasticity;  
But as a man he deviseth different devices.  
For he counteth the vibrations of her heartstrings  
And seeketh ever to pursue his scientific investigations.  
Even his own heart flutterings he counteth as a measure of fluctuations,  
And he enscribeth his passion as a formulæ.  
And his marriage is a simultaneous equation involving two unknowns,  
And yielding diverse results.  
Verily, I say unto ye, marry not an engineer.
